Completion-aware search with partial witness repair for dense fixed-shape facility layout

Junhwan Ahn[a,1], Kunwoo Lee[a,1], Kyunghyun Lee[b,*], Yeoneung Kim[c,*]

[a] *Department of Applied Artificial Intelligence, Seoul National University of Science and Technology, 232 Gongneung-ro, Nowon-gu, Seoul, 01811, Republic of Korea*
[b] *Department of Computer Engineering, Gachon University, 1342 Seongnam-daero, Sujeong-gu, Seongnam, Gyeonggi-do, 13120, Republic of Korea*
[c] *Department of Industrial Engineering, Yonsei University, 50 Yonsei-ro, Seodaemun-gu, Seoul, 03722, Republic of Korea*

Acknowledgements and funding

Yeoneung Kim is supported by the National Research Foundation of Korea (NRF) grants funded by the Korea government (MSIT) (RS-2023-00219980, RS-2026-25490291) and Yonsei University.

The funders had no role in study design; data collection, analysis and interpretation; manuscript preparation; or the decision to submit the article for publication.

Data and code availability

The code and data supporting this study are publicly available at `https://github.com/yeoneung/layout_optimization`. The repository includes benchmark generators and instances, trained policies, experimental results, and analysis and verification scripts.

Declaration of competing interests

The authors declare no conflicts of interest.
